Saturn, the most malefic and feared among the nine Jyotish planets, has entered its Uccha Rashi. An Uccha Rashi means the sign of exaltation for a planet. Shani's sign of exaltation is Libra or Tula. Today, on 15th November 2011, Shani has entered Libra. I am giving a few indications on how this transit of Saturn will affect the life on Earth.

Saturn's average stay in a sign is around two to two and a half years and it completes its journey in the twelve signs in around 28 years. The last time it had come in Tula Rashi was on 6th October 1982. It had stayed there for about three years, finally leaving Libra on 17th September 1985. During these three years shani had briefly entered Scorpio (Vrishchik) in the first half of 1985.

This year, in 2011, Shani will be in transit in this airy and movable sign from 15th November 2011 to 2nd November 2014, again for approximately three years. In between, from 16th May 2012 to 4th August 2011, Saturn will retrograde back into Kanya (Virgo) and stay there for this short duration. Then, it will be in a constant stay in Tula till 2nd November 2014.

Interestingly, Saturn will come in close yogas with all other eight planets during this three year stay as every planet, except Ketu and Jupiter, will be in transit in the sign of Libra at one time or the other during these three years. Jupiter is already in transit in Aries and it will form a samsaptak yoga with shani from 15th November 2011 to 17th May 2012. Rahu will enter Libra on 23rd December 2012 and Ketu will come in Aries in an opposition (samsaptak) with Shani at the same time.

The real face of the cause and effects of the economic problems in all nations will be revealed. The impartial justice handed out by Shani in Tula will bring down many a political leaders and big business houses. This economic and political crisis will worsen once Rahu joins Saturn in Libra on 23rd December 2012. Political assassinations, riots, genocide, big corporate litigation, penalties and punishments will take place.

For India, this is going to be a very bad time politically, socially and economically. A big drop in the demand and prices of real estate will take place. Bullion and stock market will also suffer losses. A new kind of politically motivated extremism or terrorism can raise its ugly head. Due to increased government expenses the debt will increase. This is a very bad time for the ruling coalition. A few famous people in field of religion or politics are in danger of being assassinated.

The positive news will come from the advancements in technologies, better trade links with other nations, better implementation of rules and regulations and a big reduction in corruption. Better security measures will be implemented to control financial crimes, internal security problems and the unethical manipulations in the banking and real estate sector.

The Sade Sati of Shani ends for Leo (Simha) today and it begins for Scorpio (Vrishchik). Kanya (Virgo) and Tula (Libra) will continue to be in Sade Sati. This stay of Shani in its sign of exaltation will have the following results for the twelve moon signs and ascendants:

1. Aries - Mesh: Change in job, better job offers, business gains, improved relations with

superiors at work, increase in income, gains from business in partnership, health problems to spouse.
