

The eternal guru of devas and the most powerful natural benefic among the nine Jyotish planets, Brihaspati, has entered the sign of Gemini today. Its twelve and a half months long stay in Taurus has ended now with a formation of a highly potent planetary combination with Budh and Shukra in Mithun. Let us see how the life on earth will be affected in this twelve and a half month long stay of Guru in Gemini.

The previous transit of Jupiter in Gemini was from 16th June 2001 to 5th July 2002 in the initial eight months out of which it was combined with Rahu. Those eight months witnessed the beginning of a new war on terror as a result of the 911 attacks on the twin towers in New York. Religious fundamentalism and terrorism had announced itself in a very surprising and horrifying way.

The next transit of Brihaspati in Mithun Rashi will be from 14th May 2025 to 2nd June 2026 with a small fast forward and retrograde movement in Karka Rashi from 18th October 2025 to 5th December 2025. Well, it will be interesting to watch this small stint of Guru in Cancer in 2025 during that transit in Gemini as such retrograde transition of Jupiter to its previous sign happens quite rarely in Gemini, Cancer or Leo.

This ongoing 2013-14 transit of Guru in Gemini will end on 19th June 2014 when it moves to its sign of exaltation, Cancer. During next one year Jupiter will have a constant fifth aspect on the Rahu-Shani yuti in Tula rashi thus clearing the shadows of Rahu over Shani a little bit and reducing its negative results to some extent. So, we can expect that a little relief will begin to be felt in next one month as Jupiter progresses ahead in Gemini.

But, this relief will be only regarding health and family matters for most people. Jupiter is going to be combust for most parts of June 2013 and due to its yuti with Budh till 4th August 2013 some serious fluctuations in stock markets around the world can be expected. Stricter regulations by governments, tighter norms for banking and lending, new regulations for companies, and all such much needed and much awaited changes will happen in next two months. It is better to not to deal in any short term trading in stocks. Instead, invest for long term when the down turn happens.

During this year long transit of Jupiter in Gemini, Mars will come into kendra from it for a few months when it moves forward and then backwards in Virgo in the months of December, January, April, May and June. Such yogas often create situations where heavy use of arms and ammunitions and mobilization of forces is done by governments. That could be against terrorist organizations or against some rogue states. At the same time, new developments in information technology may happen but stricter regulations on internet may also be imposed by many governments across the world.

Let us see how this transit of Brihaspati in Mithun Rashi will influence the lives of the people born under the twelve ascendants or moon signs. Those who know their ascendants should look for them below and those who do not should read the predictions for their moon signs.
