The forecasts for the twelve Moon Signs or Chandra Rashis for the year 2017 are now published on this website Jyotish Biz.

If you know the ascendant of your jyotish horoscope then you should read the same in these forecasts for 2017. For example, if your ascendant is Tula then you should read the Libra-Tula forecast.

If you are not aware of the ascendant and know only the janma rashi or the moon sign then read the forecast for the same. These are generalized forecasts and may not be applicable to you in totality. For more accurate predictions about your individual horoscope you should consult a good jyotishi with your correct and precise birth details.
