

Vivek Singh asks: I wanted to know about my career growth as it is very slow since I have joined. I wanted to know about chances of travel abroad and staying there. DOB is 04-oct-1980, time of birth is 5:40 AM, and the place is Patna, Bihar, India.

Astrologer Ashutosh: Vivek! Your horoscope shows the ascendant as Virgo and Moon Sign as Cancer. Mars in Scorpio and Moon in Cancer have made you very ambitious and strong willed. Money will always be the most desired thing in your life.

These strong points are coupled with tendencies to spend beyond means and to take big risks in life. You must realize and control these negative traits of your personality as they can be quite detrimental to your career and the financial stability in life.

This year 2010 and 2011 are very good for your career. If you try well you will be able to get a better and well paying job in the beginning of July 2010. A change in job is already on the way, only requirement is a little more effort from you.

Chances of traveling abroad and staying there for long periods are very high. The only hindrance can be your own affection and nearness to your family and relatives. The earliest and powerful chance for abroad settlement will come in May-June 2012.
