

The Online Pre-Construction Vastu analysis option is available for cases where Vastu analysis and approval of the map, architecture and interior designs of a property is to be done before construction. This gives a lot of freedom to work, think, create and innovate to the owner of the property and the Vastu expert too. This is a relatively easier task taking much less time than a post-construction Vastu analysis.

All studies and discussions in this option are done through email only.

The fees for the pre-construction Vastu analysis performed online begins at **USD 251.00** or equivalent, applicable for the study of a 1 to 3 bedroom house or a small shop or a small workshop/office area's Vastu study.

The Vastu consultation fee will increase depending on the area of the layout involved and the time and work involved in the study and design of the layout of the property.

The option of studying the horoscopes of the owners or users of the property is also available to get more accurate vastu suggestions. This involves a higher fee.

The fees is to be paid in advance through Paypal.
